

## INNOVATIVE SOUTHBAY DESIGNER INCORPORATES

# “Green” & Healthy Living INTO CLIENT’S BUSY LIFE

# KV Green

*“We look to reduce toxins in your house...”*

**April 29, 2009:** KeyVision Interiors, one of the premier Interior Design Firms in the South Bay, announces the creation of “KV/Green” a healthy, new way to care for your home. They offer a comprehensive semi-annual prescription for a healthy, green, home.

KVI’s knowledgeable team will ensure your homes’ green quotient meets the mark. They identify & correct household issues and minimize environmental risks, before they become a problem. Often unhealthy & unsafe risks lurk beneath the surface, which are not obvious to most homeowners. “From changing filters, to incorporating oxygen generating plants, to installing high efficiency light bulbs, we can make every home more beautiful and healthy, while lowering utility bills and making it run more efficiently,” says President /Designer Kelly K. Miller. They have established an over 50 point inspection list to

assure a comprehensive site analysis that will take approximately a half day to complete. Additional areas of attention are: refrigerator coils-- seals & temps, dryer vents & coils, carbon monoxide tracing, leak detection, window & door seals, smoke detector batteries and the list goes on. Pricing starts at \$450.

“We all lead very busy lives and often caring for our homes is overlooked. However, our home environments are essential to our well- being and to the health of our families,” says Miller. KV/Green allows clients to relax, knowing that their homes will be cared for year around.

KeyVision Interiors continues to lead the way in innovative interior design and creative home remodeling. KVI’s custom drapery department is on hand to complete the finishing touches. Miller says. “Every time we do something green, we make the world a little better place.”
